SUMMARY

Results-driven Software Developer with strong expertise in backend systems, API development, and full-stack application design. Passionate about building scalable, secure, and high-performance software solutions. Experienced in handling complete IT infrastructures, solving complex technical problems, and delivering clean, efficient digital systems. Continuously expanding knowledge to broaden technical perspective and improve system architecture and performance.

WORK EXPERIENCE

Software Developer & IT Systems Lead Namtag Solutions CC

Sep 2025 - Dec 2025

- Designed and developed backend systems and RESTful APIs for business automation.
- Managed and resolved all IT-related issues including networking, hardware, and system troubleshooting.
- Built and optimized PostgreSQL databases, implementing triggers, views, and performance improvements.
- Developed internal tools to streamline operations, improving workflow efficiency.
- Automated financial reporting and inventory control systems.
- Provided technical consultation and system architecture planning.
- Ensured system security, backups, and infrastructure reliability.

Access Electronics Website Development (Front-End Support)

May 2025 - Aug 2025

- Front-End Support
- Assisted with front-end styling and UI improvements
- Website development and layout consistency

PROJECT EXPERIENCE

Operational Automation System

- Built a database-driven automation system using PostgreSQL.
- Implemented triggers and functions to eliminate unstructured reporting.
- Improved reporting accuracy and reduced manual errors significantly.

Operational Automation & Financial Auditing System

- Designed a structured relational database system to replace verbose, unstructured reporting.
- Implemented triggers and functions for automated data validation and processing.
- Built views for financial transparency and reporting clarity.
- Improved operational efficiency and reduced reporting errors.

Inventory Control & Reporting System

- Developed database schemas with constraints and relationships.
- Created automation logic using triggers.
- Enhanced data accuracy and real-time stock monitoring.
-

Full Personal Portfolio Website

- Built responsive portfolio with dark/light mode functionality.
- Implemented animated hero section with crossfade background.
- Designed multi-page structure: Home, About, Projects, Skills, Services, Certificates.
- Created responsive navbar with toggle functionality.
- Applied clean UI using shades of grey, blue, black, and white.

E-Commerce Platform Concept & Wireframe

- Designed structured shopping cart page layout.
- Created categorized product sections (Clothing & Tech Gadgets).
- Developed brand identity and slogan:
- "Your One-Stop Shop for Everything You Love."
- Focused on UI structure and scalable product architecture.

Database Scheduling System

- Designed relational schema with foreign key constraints.
- Resolved UUID vs Integer relationship conflicts.
- Built structured schedule and class management system.

MutualAssist – Old Mutual Technovation Hackathon

- Designed and proposed a PWA to centralize digital customer support
- Integrated AI-driven self-service and real-time issue tracking
- Focused on improving customer experience and operational efficiency

NYDF Hub – Youth Innovation Challenge 2025

- Proposed a digital Management Information System (MIS) for the National Youth Development Fund
- Emphasized transparency, inclusivity, and scalability across 14 regions
- Contributed to an 18-page proposal focusing on architecture and governance

EDUCATION

Bachelor's Degree

NUST University

Final Year Year Student

Field: Software Engineering

ADDITIONAL INFORMATION

Technical Skills:

- Backend Development:
 - Node.js, Express.js, REST APIs
- Database Management:
 - PostgreSQL (DDL, Triggers, Functions, Views)
- Frontend Development:
 - React, JavaScript, HTML5, CSS3
- Tools & Technologies:
 - Git, GitHub, Firebase, Vercel
- Core Competencies:
 - System Architecture
 - API Design
 - Database Optimization
 - IT Infrastructure Support
 - Problem Solving
 - Full-Stack Development

Languages

- English
- Oshiwambo
- Afrikaans
